U.S. Patent and Trademark Office PTOL-413 (Rev. 04-03)

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant Farrar gave a brief overview of the invention, particularly the creation of virtual indexes, wherein an individual virtual index represents a set of physical indexes. The virtual index reduces system processing needs of a query system that selects a workload. The choice of an index is left till the very end of the process. The prior art of Lenzie was discussed, and the argument that the virtual index of the present claim is distinguishable overthe prior art was discussed. No agreement was reached, and a more careful examination of the prior art is necessary, as well as a further update of the search. The claim language of the claim was discussed as the term "less beneficial" is indefinite. Also, the terms "sought" and "set of potential phsyical indexes" was brought up for discussion.
